

PROJECT DESCRIPTION

Construction of a new workshop for the production of technical powder and household liquid detergents. Installation of a new type of equipment to improve product quality, reduce production losses and increase labor productivity.

ABOUT THE ENTERPRISE

JSC "Barhim" is one of the largest manufacturers of household and industrial chemicals, synthetic detergents in the Republic of Belarus.

The production is carried out using new equipment and technology of the Desmet Ballestra. SPA company (Italy).

Estimated volume of the investment, type of funding:

\$5 000 000

an option of acquisition the JSC "Barhim" shares

Planned project implementation time

7 years

Anticipated building area

0.2 ha

Supposed volume of the production:

2000 tons per year of powder detergents

2000-2500 tons per year of liquid detergents

PREMISES

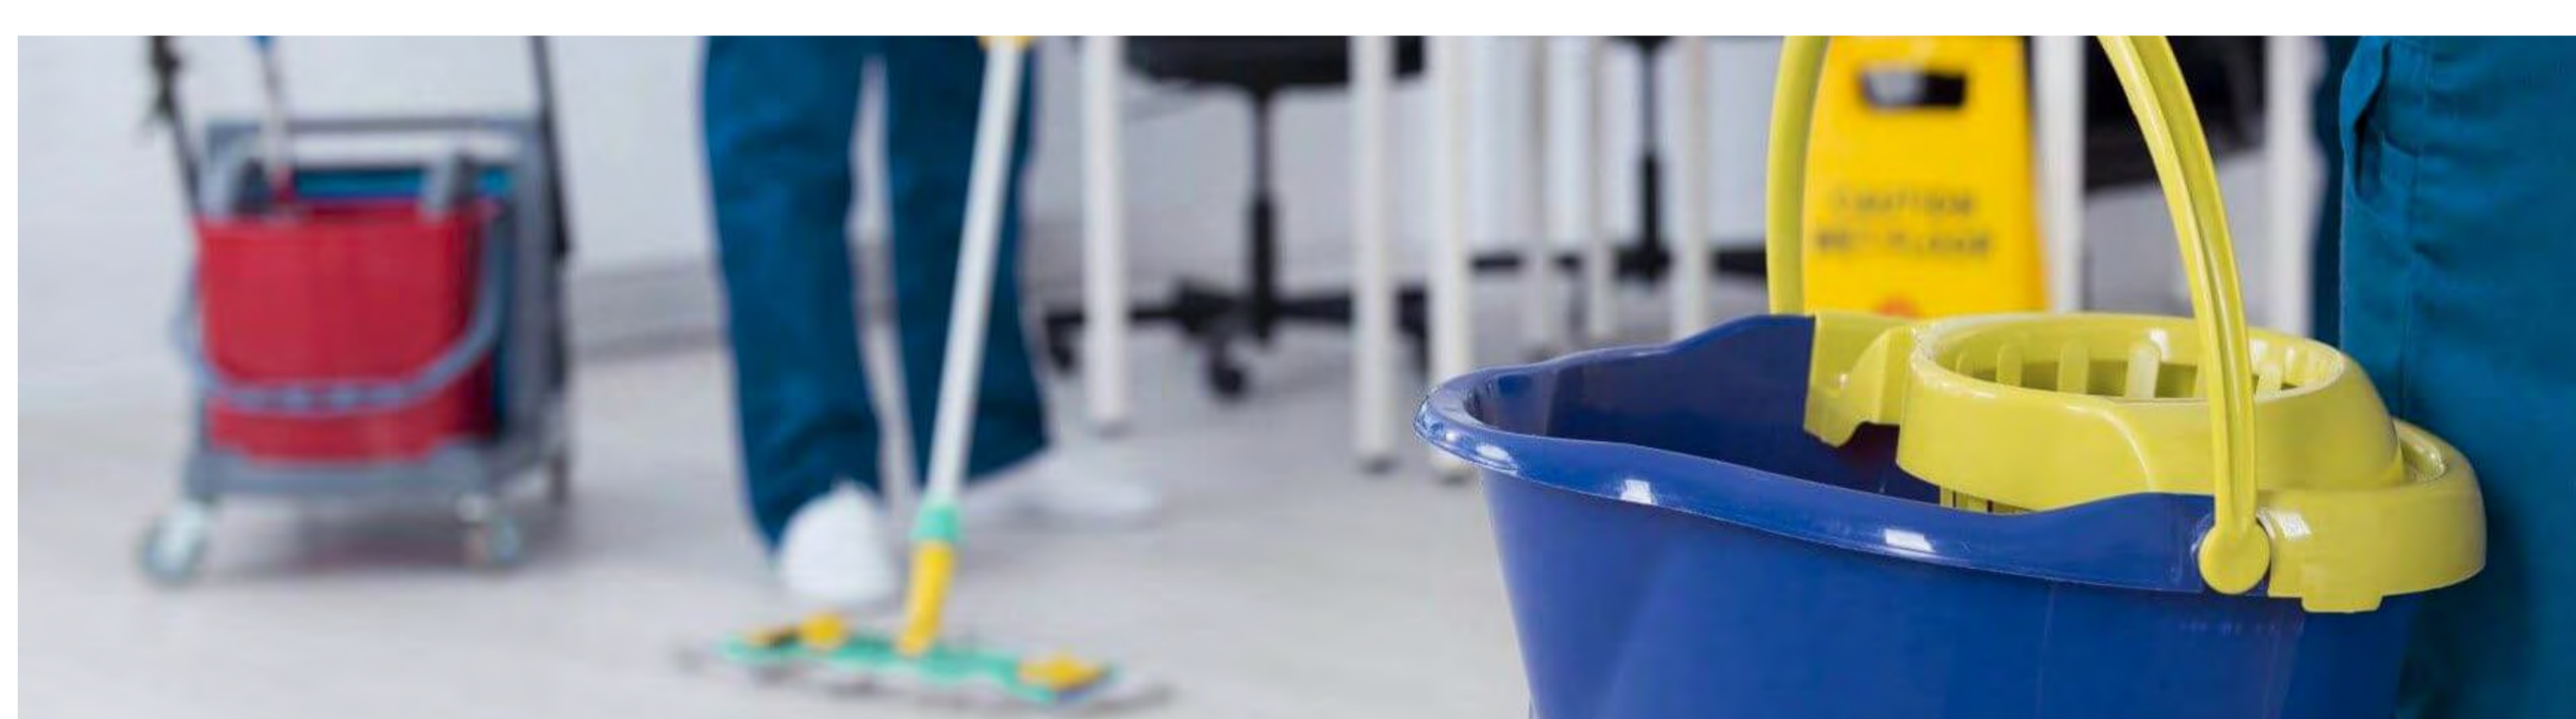

Depreciation of equipment and current production capacity does not allow the enterprise to fully meet the market demand with products. In this regard, it was decided to modernize technical means of production, to expand production and optimize production areas.

PLANNED PRODUCTS

Powder technical detergents.

Household liquid cleaning products (air conditioner, liquid soap, etc.).

In the future, it is planned to manufacture technical liquid detergents.

FIELD OF USE

- industrial use (construction, infrastructure maintenance)
- household use

SALES MARKETS

According to the information of the enterprise, there are 2105 enterprises on the market of the Russian Federation that are potential consumers of technical detergents.

During the implementation of the project, the enterprise will cover up to 80% of potential consumers of technical detergents in the domestic market.
